Live Project's i work on

1) PYROMANIAC :

Pyromaniac.com is the only fantasy football site with a soul. Our award-winning player rankings will give you the vital information to help you win your league. This is one kind of sports portal for rugby lovers. In which user can register and get all the information about match playing and as well as players portfolio etc.

(You can check this on **https://www.pyromaniac.com**)

2) VIRTUAL INSURANCE TOOLS :

Virtual insurance tools belong to the insurance company. In which insurance companies will register and companies provide login credentials to the agent to handle insurance policy. Current, I am working on this project. It is in development mode. Almost phase 1st is completed.

(You can check this on **https://virtualinsurancetools.com**)

3) PRINTORBUY :

Printoruby is italy based company and they want to develop a site in which user can buy product (Printing related) threw the website using debit, credit and bank to bank transfer checkout. For more information you can visit given link below.

4) Invoease :

Invoease is Us based an accounting software package company. Invoease products are geared mainly toward small-sized businesses and offer cloud-based accounting applications that manage and payment Invoices. For more information you can visit given link below.

(You can check this on **https://invoease.com**)

5) Investment Clearing House :

Investment clearing house is us based company. Mainly in this project user can post a project for investment and get investment threw ICH website.

(You can check this on http://investmentclearinghouse.com)
